

Living Handbooks

Up-To-Date Multimedia Handbooks

ZB MED publishes scientific handbooks through the PUBLISSO Living Handbooks publishing platform. Authors can add contributions themselves and update them at any time. The quality of the handbooks is safeguarded by an expert Editorial Board and a mandatory peer review process. As well as text-based articles, contributors can also include research data and multimedia content. All content is open access, which means it is freely available online.

Benefits of Living Handbooks:

- ▶ Academics and researchers retain the rights to their publications.
- ▶ Individual chapters can be published and updated separately at any time.
- ▶ Multimedia content is tightly integrated and can easily be accessed from within the book.
- ▶ The content is freely accessible.
- ▶ Assignment of persistent digital object identifiers (DOIs) ensures the content remains citable.
