

Advice on Open Access Publishing from ZB MED

The decision to publish a scholarly paper and the associated research data in parallel raises a number of issues and requirements. ZB MED can help you by providing up-to-date advice.

Our consulting services are aimed at the following target groups:

- ▶ Researchers and academics from the fields of life sciences
- ▶ Key disseminators from scientific libraries, graduate schools and university life science departments

We provide advice in areas including:

- ▶ Benefits of open access
- ▶ Differences between gold open access and green open access
- ▶ Publication in open access journals and self-archiving
- ▶ Quality of open access journals
- ▶ Publishing research data
- ▶ Setting up open access journals and transforming subscription journals into open access publications

We provide advice in the following ways:

- ▶ Information on the PUBLISSO website in the form of FAQs
- ▶ Personal advice by phone or e-mail
- ▶ Organising in-house information events for the target groups specified above. We provide a full range of different formats (lectures, workshops, seminars, etc.) and can tailor the event to whatever topics and level of knowledge you feel are appropriate.

Please get in touch to find out more.
