

**Research Data in the
Life Sciences –
How ZB MED Can Help**

More and more people in the scientific community are acknowledging the need for effective research data management and publishing. The drafting of data management plans is even becoming a key requirement in applications for research funding.

ZB MED offers various services related to research data:

Advice and information

- ▶ Personal consultations
- ▶ Workshops, lectures and presentations
- ▶ FAQs and lists of approved data repositories for life sciences at www.publisso.de
- ▶ DOI service: assignment of persistent identifiers (DOIs) as a member of DataCite

Publishing services for research data

- ▶ Publication of research data in parallel with GMS articles in the DRYAD data repository
- ▶ Data publishing in our specialist repository for life sciences
